

A-Health Platform: Recommended AI Models and Their Functions

Model	Primary Function
Llama 3.1	Clinical assistant, medical Q&A, report generation
MedGemma	Medical reasoning and diagnosis support
BioBERT	Medical NLP, entity extraction from records
ClinicalBERT	Clinical note understanding and summarization
Whisper	Speech-to-text for doctor/patient conversations
Piper TTS	Text-to-speech for accessibility
YOLOv11	Medical image/object detection
MONAI	Medical image analysis
XGBoost	Disease risk prediction
LightGBM	Hospital risk scoring and prediction
Isolation Forest	Anomaly/fraud detection
Prophet	Disease trend forecasting
FAISS	Vector search for medical knowledge
Qdrant	Vector database for RAG
Sentence Transformers	Embedding generation for semantic search
